Steel Architectural Awards ASEAN 2026

Presented by BlueScope

Tuah 1895

Malaysia

Tuah 1895 explores adaptive reuse as a sustainable design strategy, transforming a former sales gallery into dynamic new dining and lifestyle hub destination. Retaining the existing structural framework, the intervention introduces a new architectural language that redefines the building's identity and purpose.

Merging the new structure with the historical surroundings, fitting or adapting the new structure to the environment, and contrast.

Reimagined with the new form and facade elements - including metal cladding and reconfigured openings spaces to create lively, updated presence along the street frontage

Tuah 1895

Malaysia

Tuah 1895 explores adaptive reuse as a sustainable design strategy, transforming a former sales gallery into dynamic new dining and lifestyle hub destination. Retaining the existing structural framework, the intervention introduces a new architectural language that redefines the building's identity and purpose.

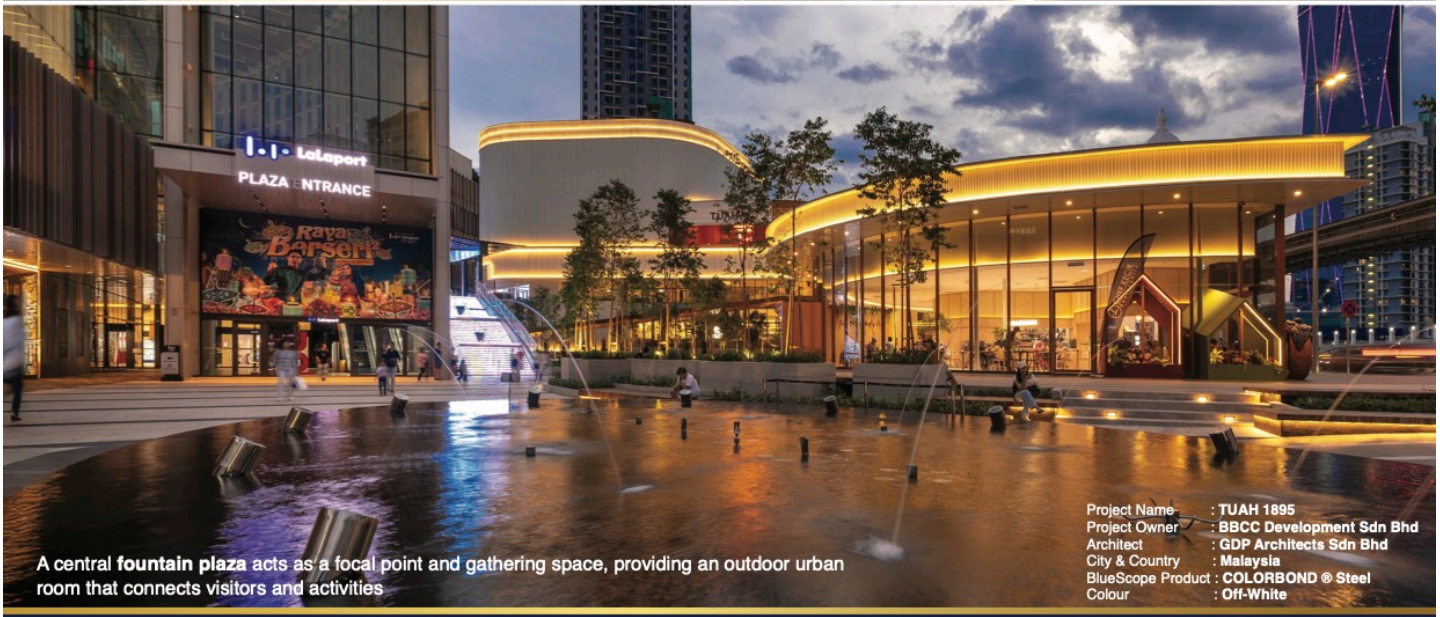

Night time identity : Lighting and facade elements are crafted to make the building a beacon in the city's nightlife and dining scene

Tuah 1895's architecture isn't merely functional - it's social and experiential. The design encourages people to linger, walk between venues, and enjoy the dynamix mix of casual and formal spaces.

A central **fountain plaza** acts as a focal point and gathering space, providing an outdoor urban room that connects visitors and activities
